me: I stole a viagra from my mom's husband out of curiosity and it didn't do shit

Mirna: nothing?

me: I read up on it after taking it, apparently it's only effective for men who can't get it up because it encourages blood flow, etc

me: a 28 male who's perfectly healthy gets no benefit

Mirna: if you were 35 you would

Mirna: according to sex and the city

me: not with my fucking genes

me: you remember my uncle who's "Dying of lung cancer?"

me: and was given two months?

me: that was a year ago

Mirna: um ya

me: went over there last night and he showed me pics of two girls he's fucking and then we smoked a bunch of cigarettes and weed

me: never gonna die

me: and my dad sure as fuck doesn't seem to need viagra either

me: but just to reiterate

me: there has been cancer eating at uncle's lungs for over a year

me: AND HE CAN STILL HAVE LOTS OF SEX

me: also, one of the girls is my cousin's old church friend
